

## Documents That Come Alive

Softedge Systems

## Breathe Life into Your Documents

with amazing ease...

Imagine if you could create and merge video into your Microsoft Office documents, then add audio, animation, text and pictures, all within one single, easy to use software package! And do all this within minutes, with just a few mouse clicks.

Welcome to DocsAlive, the all-in-one multimedia content creation software which will transform the way you create multimedia documents. No need for any other expensive and complicated software, no training required. Simply install DocsAlive and within minutes you can start creating your own multimedia documents.

*DocsAlive - the most comprehensive, yet the most affordable multimedia content creation software.*

DocsAlive gives the student or business user the power to create any type of multimedia content in an easy-to-use and interactive environment.

Create and merge any multimedia content you wish into your reports, presentations, manuals, theses, instruction booklets, information documents, web pages, marketing-shots.

### No Need for Complicated, Expensive Software!

Unlike the current offerings available, which necessitate multiple products for creating and integrating multimedia content, DocsAlive is an all-in-one, easy to use tool for creating multimedia content. The integration with Microsoft Office means that no training or programming is required. It is easy to use and very affordable.

DocsAlive really puts you "in the software", so you can create, shape, form and make multimedia documents the way you want, in minutes.

With no learning curve and all your work created and integrated in the DocsAlive software package, it truly breathes life into your documents with amazing ease.

## A Picture Paints a Thousand Words

- Want to introduce students to computers and mainstream tools?
- Need to include and encourage students of all abilities to express themselves?
- Thinking about e-portfolios?

### See How With DocsAlive

*Now you can produce reports, projects and documents that come alive with multimedia. But the really amazing thing is that you don't need to learn a new complicated software package.*

*DocsAlive is a new tool that integrates and extends the capabilities of Word and Powerpoint - software you probably know and use more than most other products. You can use these packages as normal - DocsAlive adds multimedia features to*

I would say many good things about DocsAlive- it's easy to use, great fun and we constantly find new uses for it..

### Use Your Creativity. Express Yourself. Show Evidence. Stand Out.

With DocsAlive and Office you can create

- Video
- Pictures
- Audio
- Animation / Presentations
- Video and Audio Editing
- Picture Manipulation

and really bring your document to life. You can do this directly within a Word document - no need for expensive additional software. There is no need to learn a new package.

### Need to Consider Inclusion?

Use DocsAlive for:

- Pupils with learning difficulties - as a rich, easy way to express themselves
- Students who have difficulties in writing documents
- Where English is not a first language

And the list does not end there our users, students and teachers alike find a variety of different uses for the software, from music instruction to newsletters the possibilities are endless.

### A Valuable Tool for Students and Teachers at All Levels

DocsAlive provides a great introduction to computers for young students very quickly they will create interactive multimedia documents. And they will get familiar with Microsoft Office learning essential skills that will stand them in good stead for the future. As students progress to higher levels of education they can use DocsAlive for more demanding requirements like ePortfolios
